2.1 Net zero target year*
2050

2.1.1 Base year*
2022

2.2 Near-term target*
50 of absolute scope 1+2 emission reduction from my base year by 2040

Own Emissions *

3.1 To reduce emissions in line with my commitment, my company has a plan and is taking action*
Yes

Energy consumption

3.2 Total energy consumption*
18816 kwh

3.3 Renewable energy*
8090 kwh

Scope 1 emissions

3.4 Scope 1 emissions*
0 metric tons CO2e

Scope 2 emissions

3.5 Location based scope 2 emissions*

6.61 metric tons CO2e

3.7 Describe your plans and actions taken to reduce scope 1 & 2 emissions.*

Working group tasked with identifying and reducing key drivers of emissions. Internal action plan drafted annually and reported against to senior leadership team.

3.8 Describe the calculation methodology and comment on the data accuracy, including any tools/methods used to calculate.*

We used the Normative Business Carbon calculator, provided as part of the SME Climate Hub suite of tools. The data is derived from a survey of all employees, based on energy bills details. There were challenges with the tool this year, which reduced our confidence in the accuracy of its calculations and delayed us during the reporting period.

Value Chain Emissions (optional)

Scope 3 emissions

4.1 Have you measured any of your scope 3 emissions?

Yes

4.1.1 Total scope 3 emissions

1110 metric tons CO2e
